Re: Request for A New Study of Pilgrim's Vulnerability to Flooding

Dear Mr. Dent,

On behalf of Jones River Watershed Association (JRWA), located 8 miles from Pilgrim, I am writing to request that Entergy conduct a study of site elevations at Pilgrim and provide the report to the public. The reasons for this request are described fully in the attached report from Northeast Geospatial Research Professionals conducted for JRWA and the accompanying fact sheets.

The 2015 Winter Storm "Juno" demonstrated that climate change impacts such as flooding, rising sea levels, storm surges and waves affect Pilgrim's operations. The study we request is necessary to assure the community that Pilgrim's infrastructure, operations and nuclear waste storage can meet future challenges of such events.

Entergy asserts that public safety and environmental protection are top priorities. We hope that Entergy will take the opportunity to demonstrate this to the public by doing the study we request.

We request the courtesy of a response by February 24, 2015. Please feel free to contact me at 781-585-2322 or pine@jonesriver.org with any questions. I look forward to your response.

Sincerely,

A handwritten signature in black ink, appearing to read "Pine duBois". The signature is written in a cursive style with a horizontal line above the name.

Pine duBois
Executive Director
